Are you a writer struggling to unlock your creativity? Do you need assistance with exploring new styles and writing your stories better?

WritewithLaika might just be the AI tool for you.

You can train LAIKA to write like you or anyone else. It can provide assistance with inventing characters, conjuring images, creating conversations, and more with its' "brains", which are collections of tone of voice, context, characters, and places that can be used to write in different styles.

Imagine this scenario:

You're assigned to create a captivating story for a course demo, and the deadline is fast approaching. As you sit down to start writing, you find yourself stuck at the beginning, unsure of how to kick off the narrative.

Enter iStory, an interactive storytelling tool that integrates voice and AI, rich media, and analytics to create unique experiences allowing audiences to engage online in their own way and choose the path of the story.

With its ability to track engagements and collect first-party data, it can significantly improve your content marketing efforts.
