ChatGPT

- **Supports 20+ languages:** ChatGPT can understand and generate text in more than 20 languages.
- **Ability to generate human-like responses:** It can produce more natural-sounding text largely due to the vast amount of data it has been trained on.
- **Speedy response times:** The tool's response speed can help businesses become more efficient.
- **User friendly:** It can perform a wide range of tasks, from translating to condensing paragraphs to producing song lyrics, and it can do so for a wide audience.

Please note that the free version of ChatGPT has no knowledge of events after 2021.

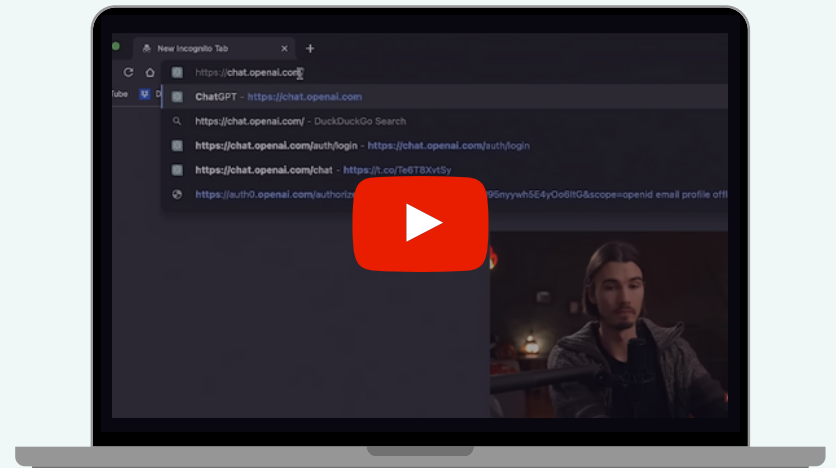

For certain countries like China, Russia, Iran and Cuba where ChatGPT is banned, you might need to install a VPN to access it.

In an information-driven world, conducting comprehensive research can be a time-consuming task.

Ever found yourself overwhelmed with countless sources, struggling to gather relevant insights for your projects?

Say hello to your research ally—Google Bard.

Seamlessly integrated with Google's extensive knowledge base, Google Bard offers comprehensive, accurate, and up-to-date results at your fingertips.

Click on the logo to navigate to the app.

Take a look at the impressive list of features Google Bard offers:

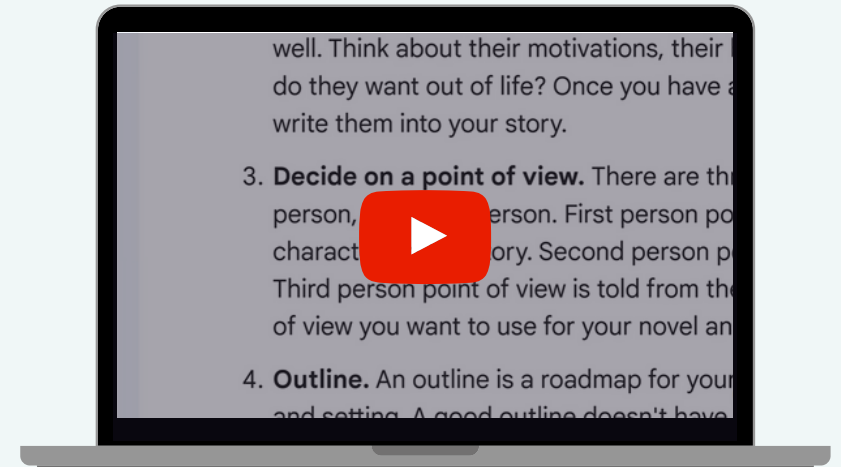

- **High-quality text generation:** Google Bard can produce human-like text that can be used for a range of tasks, from answering queries to summarizing material and more.
- **Large dataset:** The tool is pretrained on a massive dataset of text and code, which allows it to generate more comprehensive and informative responses.
- **Access to the internet:** It was trained on data that has instant access to the internet and has a more up-to-date library, allowing it to produce more current responses than other chatbots.
- **Language support:** Bard supports U.S. English, Japanese and Korean and can translate other languages.

Case Study

Using ChatGPT, Bard, and Smodin/Write Plus to create an introduction to a short course.

To test the capabilities of the text apps and their answer variation, we prompted the 3 apps: ChatGPT, Bard, WritePlus and Wordtune to come up with an introduction to a course using AI in business.

Prompt:

“Please generate a 100-word introductory paragraph about a course using AI for business.”

#1 ChatGPT

**Here is what
ChatGPT
came up
with.**

Please generate a 100-word introductory paragraph about a course using AI for business.

Welcome to the cutting-edge course on "AI for Business: Empowering Innovation and Growth." In today's rapidly evolving landscape, artificial intelligence (AI) has emerged as a transformative force, revolutionizing the way businesses operate. This comprehensive program is designed to equip forward-thinking professionals like you with the knowledge and skills to harness the potential of AI, gaining a competitive advantage in the market. Through a blend of theoretical insights and practical applications, you will explore the diverse facets of AI, including machine learning, natural language processing, and data analytics, understanding how to leverage these technologies to optimize decision-making, automate processes, and unlock untapped opportunities. Join us on this transformative journey and unlock the power of AI to drive innovation and accelerate your organization's growth.

#2 Bard

Here is what
Bard came
up with.

Please generate a 100-word introductory paragraph about a course using AI for business.

View other drafts ▾ 🔊

✦ Sure, here is a 100-word introductory paragraph about a course using AI for business:

Artificial intelligence (AI) is rapidly transforming the business landscape. From customer service to marketing to product development, AI is being used to automate tasks, improve decision-making, and create new opportunities.

This course will provide you with the knowledge and skills you need to use AI for business success. You will learn about the different types of AI, how AI is being used in businesses today, and how you can apply AI to your own business.

The course will cover a wide range of topics, including:

- The history of AI
- The different types of AI
- The ethical implications of AI
- How to use AI for customer service
- How to use AI for marketing
- How to use AI for product development

By the end of the course, you will be able to:

- Understand the basics of AI
- Identify the different types of AI
- Evaluate the ethical implications of AI
- Apply AI to your own business

This course is essential for anyone who wants to stay ahead of the curve in the age of AI. If you are a business leader, a marketer, a product developer, or anyone else who wants to use AI to improve your business, then this course is for you.

#3 Write+AI

WRITE + AI

**Here is what
WritePlus
came up with.**

Are you looking to stay ahead of the competition? Artificial Intelligence (AI) for business is the way to go! AI can help businesses automate tasks, improve customer service, and increase efficiency. With this course, you'll learn how to use AI to its full potential for your business. You'll learn about the various types of AI, how to set up AI systems, and best practices for implementation. You'll also gain an understanding of how AI can be used to analyze data, improve customer service, and automate processes. With this course, you'll be on the cutting edge of business technology and stay ahead of the competition. Enroll now and learn how to use AI for business today!

#4 Wordtune

**Here is what
Wordtune
came up with.**

< Regenerate Done

Artificial intelligence (AI) has revolutionized various industries, and business is no exception. In today's fast-paced and competitive business landscape, organizations are increasingly turning to AI to gain a competitive edge. A course on AI for business aims to equip professionals with the knowledge and skills necessary to leverage AI technologies and strategies to drive growth and innovation. Through this course, participants will explore the fundamentals of AI, including machine learning, natural language processing, and predictive analytics. They will also delve into real-world applications of AI in business, such as customer relationship management, supply chain optimization, and financial analysis. By the end of the course, participants will be well-prepared to navigate the AI-driven future of business and make informed decisions that maximize their organization's success.

Case Study

Using Wordtune and Netus.ai to summarise text from ChatGPT's previous example.

To test the summarization capabilities of the text apps Wordtune and Netus.ai, we prompted the 2 apps to summarise the text copied from ChatGPT's AI for business course paragraph.

Here is what Wordtune came up with.

The screenshot displays the Wordtune application interface, split into two panels. The left panel, titled 'Summary', contains a single bullet point: 'Artificial intelligence (AI) has emerged as a transformative force in today's rapidly evolving landscape, revolutionizing the way businesses operate. This comprehensive program is designed to equip forward-thinking professionals with the knowledge and skills to harness the potential of AI.' The right panel, titled 'Original', shows the full text of the paragraph being summarized, with the first two sentences highlighted in purple. The original text reads: 'Welcome to the cutting-edge course on "AI for Business: Empowering Innovation and Growth." In today's rapidly evolving landscape, artificial intelligence (AI) has emerged as a transformative force, revolutionizing the way businesses operate. This comprehensive program is designed to equip forward-thinking professionals like you with the knowledge and skills to harness the potential of AI, gaining a competitive advantage in the market. Through a blend of theoretical insights and practical applications, you will explore the diverse facets of AI, including machine learning, natural language processing, and data analytics, understanding how to leverage these technologies to optimize decision-making, automate processes, and unlock untapped opportunities. Join us on this transformative journey and unlock the power of AI to drive innovation and accelerate your organization's growth.'

Summary

- Artificial intelligence (AI) has emerged as a transformative force in today's rapidly evolving landscape, revolutionizing the way businesses operate. This comprehensive program is designed to equip forward-thinking professionals with the knowledge and skills to harness the potential of AI.
