ChatGPT

- **Supports 20+ languages:** ChatGPT can understand and generate text in more than 20 languages.
- **Ability to generate human-like responses:** It can produce more natural-sounding text largely due to the vast amount of data it has been trained on.
- **Speedy response times:** The tool's response speed can help businesses become more efficient.
- **User friendly:** It can perform a wide range of tasks, from translating to condensing paragraphs to producing song lyrics, and it can do so for a wide audience.

Please note that the free version of ChatGPT has no knowledge of events after 2021.

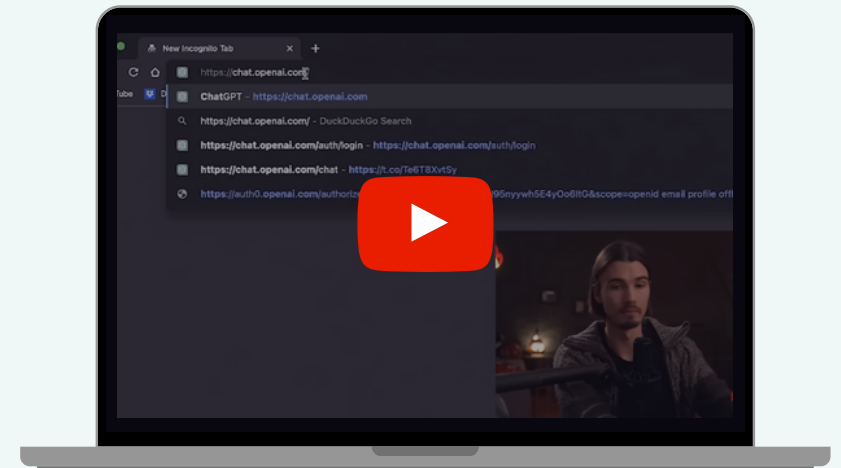

For certain countries like China, Russia, Iran and Cuba where ChatGPT is banned, you might need to install a VPN to access it.

In an information-driven world, conducting comprehensive research can be a time-consuming task.

Ever found yourself overwhelmed with countless sources, struggling to gather relevant insights for your projects?

Say hello to your research ally—Google Bard.

Seamlessly integrated with Google's extensive knowledge base, Google Bard offers comprehensive, accurate, and up-to-date results at your fingertips.

Click on the logo to navigate to the app.

Take a look at the impressive list of features Google Bard offers:

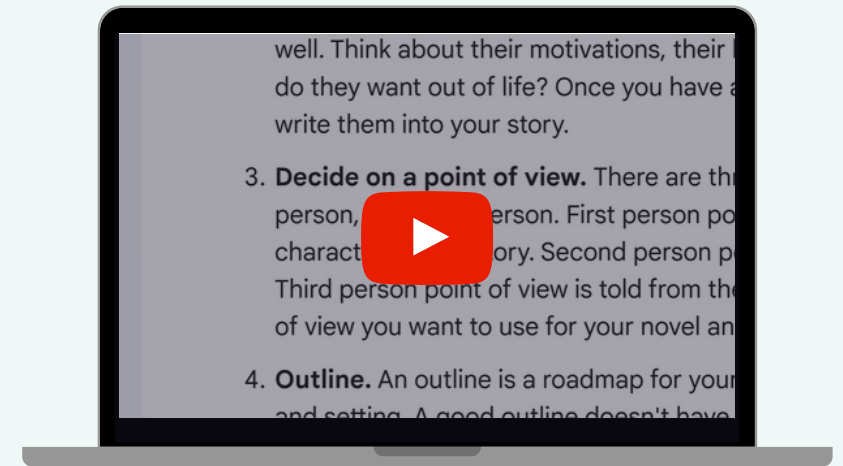

- **High-quality text generation:** Google Bard can produce human-like text that can be used for a range of tasks, from answering queries to summarizing material and more.
- **Large dataset:** The tool is pretrained on a massive dataset of text and code, which allows it to generate more comprehensive and informative responses.
- **Access to the internet:** It was trained on data that has instant access to the internet and has a more up-to-date library, allowing it to produce more current responses than other chatbots.
- **Language support:** Bard supports U.S. English, Japanese and Korean and can translate other languages.

Whether it's an important email, a client proposal, or a social media post, finding the right words to convey your message effectively can be a challenge.

But we've got the solution for you - Wordtune.

WordTune looks at elements like flow, tone, word choice, and structure to offer personalized revisions that make your writing clearer, more concise and engaging.

Their AI writing assistant analyzes your text and provides suggestions to tighten, polish and improve your writing.

Click on the logo to navigate to the app.

Here are some of Wordtunes' features:

- **Rewriting:** It helps to reword content to sound better to readers, suggesting more formal phrases.
- **Tone checker:** The tool helps you match the tone you are trying to write in, from casual to formal.
- **Thesaurus:** Wordtune's thesaurus feature helps you rephrase and reword your content to sound concise and thorough, and also has a synonyms option to avoid repetition in your writing.
- **Length editor:** It can either summarize and shorten your writing or lengthen it, giving you the ability to format your content however you like.

Say goodbye to the struggle of searching for the perfect words and let Wordtune be your creative companion.

Case Study

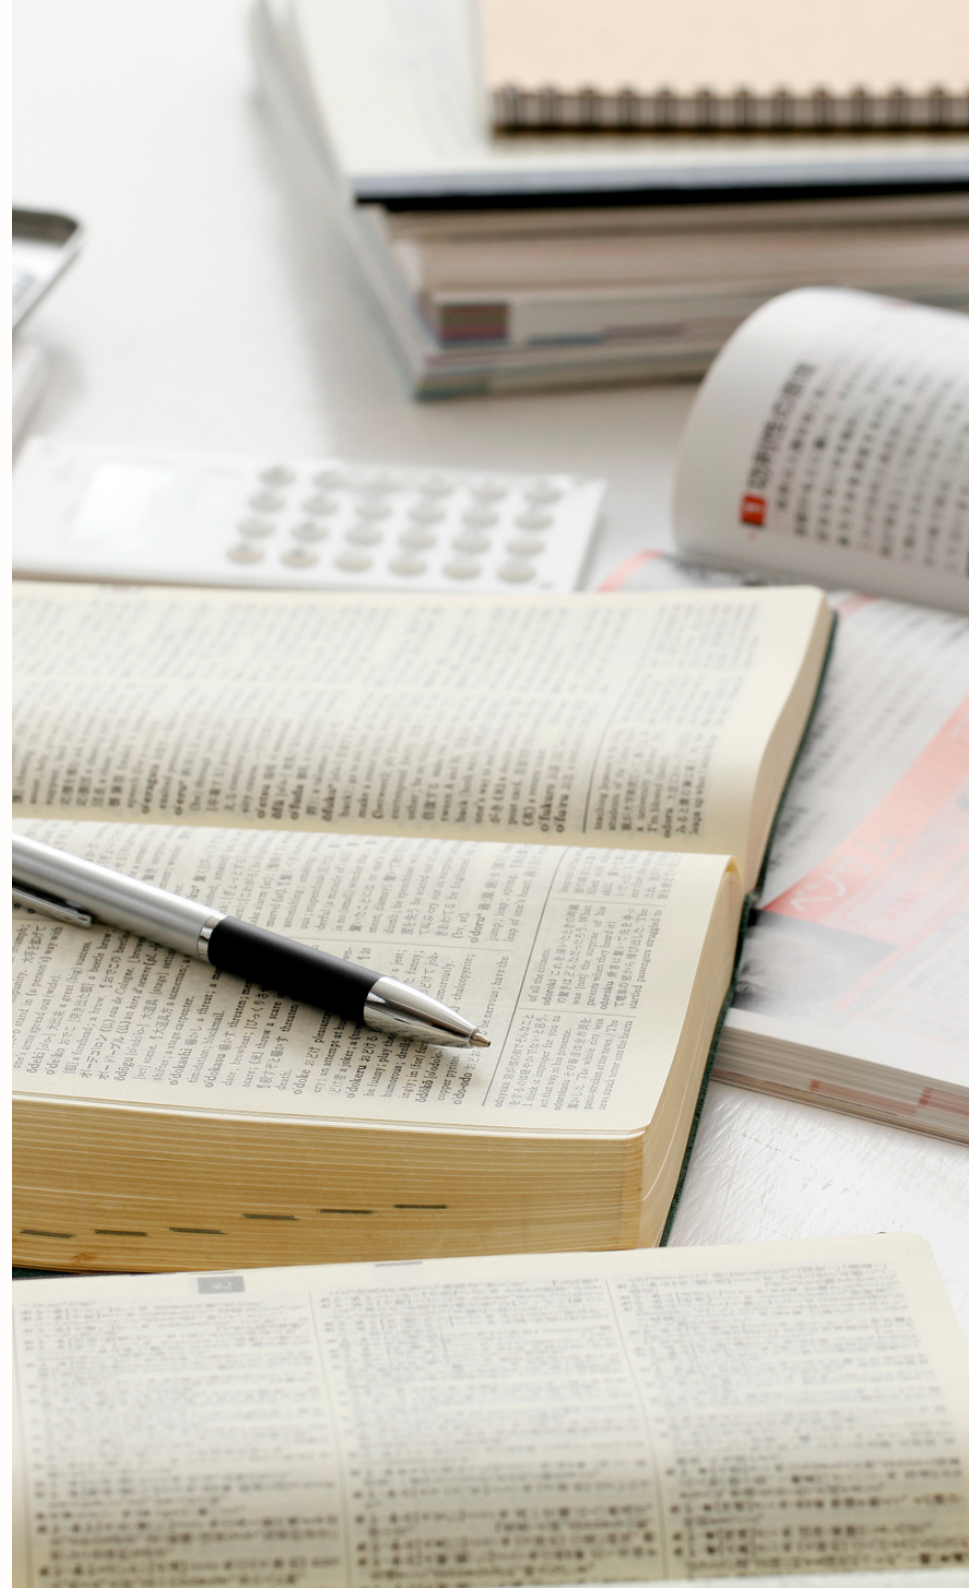

**Using ChatGPT, Bard, and
Smodin/Write Plus to
create an introduction to
a short course.**

To test the capabilities of the text apps and their answer variation, we prompted the 3 apps: ChatGPT, Bard, WritePlus and Wordtune to come up with an introduction to a course using AI in business.

Prompt:

"Please generate a 100-word introductory paragraph about a course using AI for business."

#1 ChatGPT

ChatGPT

WritePlus
came up with.**

#4 Wordtune

**Here is what
Wordtune
came up with.**

Case Study

Using Wordtune and Netus.ai to summarise text from ChatGPT's previous example.

To test the summarization capabilities of the text apps Wordtune and Netus.ai, we prompted the 2 apps to summarise the text copied from ChatGPT's AI for business course paragraph.

Here is what Wordtune came up with.

The screenshot displays the Wordtune application interface, which is split into two main sections: 'Summary' and 'Original'.

Summary Section: At the top, there are tabs for 'Summary' and 'Notes'. Below the 'Summary' tab, a single bullet point provides a condensed version of the original text: "Artificial intelligence (AI) has emerged as a transformative force in today's rapidly evolving landscape, revolutionizing the way businesses operate. This comprehensive program is designed to equip forward-thinking professionals with the knowledge and skills to harness the potential of AI." Above this text are icons for copy, download, and share. Below the text is a cursor icon (←|).

Original Section: This section displays the full, unsummarized text. The text reads: "Welcome to the cutting-edge course on 'AI for Business: Empowering Innovation and Growth.' In today's rapidly evolving landscape, artificial intelligence (AI) has emerged as a transformative force, revolutionizing the way businesses operate. This comprehensive program is designed to equip forward-thinking professionals like you with the knowledge and skills to harness the potential of AI, gaining a competitive advantage in the market. Through a blend of theoretical insights and practical applications, you will explore the diverse facets of AI, including machine learning, natural language processing, and data analytics, understanding how to leverage these technologies to optimize decision-making, automate processes, and unlock untapped opportunities. Join us on this transformative journey and unlock the power of AI to drive innovation and accelerate your organization's growth." A 'Highlight' icon is visible in the top right corner of this section.

Here is what Netus.ai came up with.
Unfortunately, you can only do so much on the free version.
